

iBoot-G2+

Reboots the failed system to get you back online fast!

Easiest Way to Minimize Downtime

Minimize downtime to keep your critical systems running and your customers happy. iBoot provides automatic and web controlled power switching to quickly get you back online fast.

This model is equipped with 2 outlet expansion ports to protect even more devices. If you are looking for a basic product with a limited amount of features, please check out the *iBoot-G2*.

Control one or many iBoots with a single sign-on using the free iBoot Cloud Service. Just log in and you are instantly in control of as many locations as necessary.

Top Features:

Simple Web Browser Operation

Just point your browser to the iBoot, login and you are one click away from bringing that failed system back to life

All setup functions are easy to configure from the browser

Free Cloud Service

Manage an unlimited number of iBoots from a single login

Eliminate port forwarding and dynamic DNS issues

More secure with outbound connections only

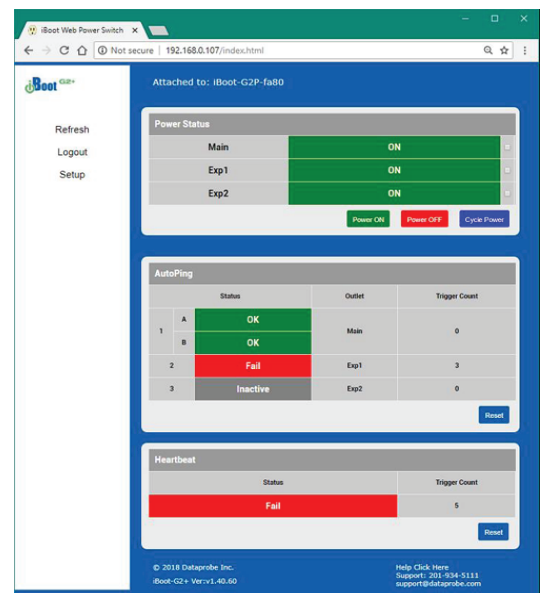

2 Expansion Ports

Includes 2 customizable external I/O to expand to 3 outlets or for outlet control

Plus

USB port for direct serial control and programmable shutdown prior to auto power reboot

Includes additional autoping triggers

Additional Features

Automatic System Restoral	AutoPing detects network or equipment outage and takes immediate action to restore your network or device. Real time scheduling to have a fresh reboot each morning or minimize power waste at night.
